

- A. I chose a training that handles first aid, CPR, and AED.
- B. This course was found on this website: [Adult, Child and Baby First Aid/CPR/AED Online \(redcross.org\)](https://www.redcross.org).
- C. I chose this course because I don't know how to handle common medical supplies nor deal with common injuries. At best, I am confident in applying bandages. I believe it would be very useful to knowing how to handle common injuries because they are common. Of course, I highly doubt I would remember most of the information from this course when the knowledge is needed, however, it is probably better to have a higher chance of knowing what to do than doing nothing at all because I don't know anything.
